

Shane Maris

Design Systems & Ops Leader

Dallas, TX · 214.546.3047 · contact@shanemaris.com · [linkedin.com/in/shanemaris](https://www.linkedin.com/in/shanemaris)

Design systems and design ops leader with a decade-plus career at Southwest Airlines, currently driving strategy for the airline's customer-facing commercial design system, spanning responsive web and native iOS and Android.

EXPERIENCE — SOUTHWEST AIRLINES, 2011 TO PRESENT

Digital Product Manager, Design Operations

DEC 2022 TO PRESENT

- Led Southwest's migration off Sketch and Abstract onto Figma as the single org-wide design tool, growing adoption from roughly 100 total seats (20 design seats) to 2,706 total today (320 of those paid/functional) across the company; led onboarding company-wide and have set up workspaces for groups across the organization
- Established design systems governance and adoption standards spanning UX, Content Design, Product, and Engineering pods, coordinating across Digital, Marketing and Technology departments
- Prototyped an AI-powered component inventory tool in a weekend — including a component health dashboard, real-time Q&A agent, and governance intake system — avoiding a planned \$150K/year vendor purchase (Knapsack); currently paused while foundational v1 work brings HDS to a state that's actually AI-ready, informing the roadmap toward v2
- Directly managed a contractor through a proof-of-concept that validated extending HDS to native iOS and Android — work that led to a new long-term contractor relationship I continue to manage today, including skip-level visibility with leadership
- Industry recognition: invited by Figma to co-present on its "In The File" content series, covering Southwest's design system journey and real-world use of the Design Token Playbook, variables, and Dev Mode

Lead UX Designer

MAR 2022 TO DEC 2022

- Defined and documented Heart Design System vision, establishing the strategic foundation for governance of HDS across Digital, Technology, and Marketing

Senior UX Designer

FEB 2019 TO MAR 2022

- Pioneered the internal business case for design systems adoption at Southwest, early thinking that directly led to Heart DS, approved by the Director of Brand and the Managing Director of Digital
- Co-founded and co-led the UX Community of Practice (with another UX Designer), establishing shared design standards across teams

UX Designer

APR 2014 TO FEB 2019

- A core UX Designer on Vision, Southwest's multi-year overhaul of southwest.com, designing and launching core customer flows including Flight Status, Check-In, Cancel, Plan Trip, My Account, Rapid Rewards Shopping, and the original WiFi/IFE Portal, plus the EarlyBird Standalone flow, Business Select upgrades, and the Gift Card purchase experience

Web Designer

FEB 2012 TO APR 2014

- Transitioned from contractor to FTE; designed and built Southwest's first mobile-optimized sale landing page, driving a 200% increase in mobile shopping immediately post-launch

EDUCATION AND CERTIFICATIONS
